
**CASELOAD PER FULL-TIME EMPLOYEE
EQUIVALENT REPORT**

**NEBRASKA COUNTY COURTS
2005**

**Prepared by The Nebraska Supreme Court
Office of the State Court Administrator**

2005 FTE REPORT

The Caseload Per Full Time Equivalent Report is used to compare the workload of county courts across the state.

This workload comparison is shown in two different columns on the report.

2005 Caseload Per FTE

This computation is made by dividing the actual case filings by the number of full time equivalent employees in a court.

2005 Adjusted Caseload Per FTE

Before computing the caseload per full time equivalent, the case filings are adjusted in the following manner:

500 cases are added to the annual case filings for each judge who utilizes a county court as his or her home court.

500 cases are added to the annual case filings for each court stenographer who works in a county court.

250 cases are added to the annual case filings if the court is a "one person court."

These adjustments are made to compensate for the workload that is not case-related in the situations described above.

800 - 1,200 cases per full time equivalent is considered an average or satisfactory workload range.

Symbol definitions listed below:

| | |
|----|---|
| J | Residing Judge |
| CS | Court Stenographer |
| # | Courts that share a Clerk Magistrate |
| ^ | Clerk Magistrate does court stenographer work |
